

Upgrading SSIS

When using script tasks

SSDT 2015+

- Allows you to specify the target server version

SSIS 2016+

- Packages, tasks and components are upgraded automatically via the upgrade wizard
 - <https://docs.microsoft.com/en-us/sql/integration-services/install-windows/upgrade-integration-services-packages-using-the-ssis-package-upgrade-wizard?view=sql-server-2017>
- Script tasks need some extra work
 - <https://mitchellpearson.com/2015/04/13/upgrading-script-tasks-in-ssis-target-of-invocation-on-script-task/>
- *Custom components & tasks can be version-specific as well!*
 - <https://blogs.msdn.microsoft.com/sqlgardner/2016/08/17/ssdt-vs2015-gotcha-target-server-version-new-feature/>

BIML

- Won't be a problem
- Just re-generate in your new project
